

2019 ANNUAL REPORT

A Message to Our Citizens:

A five year Strategic Plan has been created to direct our path towards exceptional facilities and services for our citizens. Clayton County Parks and Recreation made significant progress in its outstanding service to the community in Fiscal Year 2019. Through planning, public input, and partnerships, we accomplished important milestones that positively affect residents from all walks-of-life. At the forefront were major renovations to your parks system that will continue into the coming years. We are also proud to report that CCPR's District Four Recreation/Administration building is under construction along with the Intergenerational Center. A new water park and other amenities will be added in the near future. The phase four trail system additions are completed with additional trails to be added. Crucial to future planning is maintaining the SPLOST Funds, which is a major source for funding for CCPR projects. In 2020 a new Greenways and Open Space Master Plan will be released. As always, we remain committed to the health and well-being of our community in everything we do.

Sincerely,

Troy Hodges, Director
